

SMART RAPID SINGLE PATIENT

ABSOLUTE HYGIENE

Developed in close cooperation with hygiene authorities and specially designed for one-time application, the single patient cuff is ideal for use as part of an integrated hygiene concept. The single use of the cuff significantly minimises risk of cross-contamination in everyday medical practice. The materials used are especially skin friendly, dermatologically safe and ensure comfortable wear for the patient. The clearly visible position indicators enable flawless application of the cuff - consisting of the cover and integrated inflation bladder - for optimal measurement results. Quality and functionality - here at ERKA. we constantly strive for perfection and apply this high standard to all of our products. To that end, our quality control is rigorous: each and every ERKA GREEN CUFF is tested for proper operation - this is our ERKA. 100% Quality Check. In addition, our cuffs fulfill all requirements of the latest AAMI and AHA guidelines for correct blood pressure cuff size.
